

Smart Socket

User Manual

Wiring for smart socket

* Please wire for the socket according to the diagram:

Specification

| | |
|-----------------|----------------------|
| Model Number | WOT20-EU/ZWOT20-EU |
| Working Voltage | AC 120~240V(50/60Hz) |
| Max Load | 16A(3200W) |
| USB/Type C | 9V/2.2A; 12V/1.67A |
| Network connect | WiFi 2.4GHz/Zigbee |

Internet connection

1.Scan the QR code to download "Smart Life" or "Tuya Smart" APP.

2. Long press the power button for more than 3 seconds until the indicator light begin to flash quickly, this means the device is already for configuration.

3. (Wi-Fi)

a. Open your "Smart Life" APP and click "+" on the top right corner of the APP. Select Device Type, click it and "indicator light rapidly blink". These will automatically fetch the password of the Wi-Fi network that your mobile phone connected to. Then tap "Confirm" to connect to the device.

b. When appears "Successfully added 1 device", it means the connection is complete and your device will be listed in your smart product list in the app.

3. (Zigbee)

a. Make sure you already have a zigbee gateway connect to the network.

b. Open the gateway panel to search for devices. After finding the socket, add it to complete the network configuration.

c. Go to the device control panel, then it can be used normally.

Works with Google Home

Preparation

- * A Google Home device, or an Android phone with Google Assistant.
- * Latest Google Home APP (Android only) and a Google account.
- * The device display language must be set to EnglishUS
- * Smart Life APP and a related account.
- * Smart device.

Sign in with Smart Life account, add the device, then change the name to a easily recognized word or phrase, like "bedroom light".

Set up with Google Home APP

- * Open the Google Home APP and sign in a Google account. Then connect the Google Home APP with your Google Home device according to the Instruction of Google Home.
- * Choose the Wi-Fi network you want to connect to your Google Home. Then connect it to your Google Home according to the Instruction.

Make sure your Google Home APP and Google Home are in the same Wi-Fi network.

Link Smart Life account in Home Control

Attention: Due to the Google Home APP's known bug, you could use only one Google Home account to control "Home Control Action". If you sign in Google Home APP with several Google accounts, only the first Google account you signed in can be used for "Home Control".

- * Tap "Home Control" in the hamburger menu on the Google Home APP's Home Page, then tap "+".
- * Find "Smart Life" in the list. In the new window, select your Smart Life account region, type your Smart Life account and password, then tap "Link Now". After you assign rooms for devices, your devices will be listed in the Home Control page.

Control your smart devices through Google Home

Now you can control your smart device through Google Home. Take bedroom light as the example, the supported voice commands are as below:

OK Google, turn on/off bedroom light.
OK Google, set bedroom light to 50 percent.
OK Google, brighten/dim bedroom light
OK Google, set bedroom light to red.

Works with Amazon Alexa

Preparation

- * Amazon Alexa APP and account
- * Smart Life APP and account
- * An Echo device, including Echo, Echo Dot and Echo Tap.
- * Smart device.

Sign in with Smart Life account, add the device, then change the name to a easily recognized word or phrase, like "bedroom light".

Set up Echo with Amazon Alexa APP

Sign in with Amazon account. Tap the Homepage on the top left, tap "Settings" and "Set up a new device". Then follow the instructions. Select a Echo device, long press the dot button on the top of your Echo device until the orange light shows up and tap "Continue". Then select your Wi-Fi network and connect it to your device according to the instructions. This may take several minutes.

Enable our skill in Alexa APP

- * Tap the Homepage, select "Skills", then search "Smart Life". Select "Smart Life" and tap "Enable Skill" to enable the Smart Life Skill.
- * You will be redirected to the account link page. Type your Smart Life account and password, do not forget to select the country/region where your account belongs to. Then tap "Link Now" to link your Smart Life account. When "Alexa has been successfully linked with Smart Life" shows up, you can leave this page. (Note: If a Smart Life account has been linked before, you can use it directly, you can also tap "Disable Skills" to remove it.)

Control your smart device through Echo

- * Echo need to discover your smart device before the control. You can say "Alexa, discover device" to Echo, or you can also tap "Discover Device" on APP to discover the smart devices. Discovered devices will be shown in the list. (Note: Every time you change the name of devices on Smart Life APP, Echo must re-discover devices before the control.) Now you can control your smart devices through Echo. You can use following commands to control your devices (e.g., bedroom light):

Alexa, turn on/off bedroom light.
Alexa, set bedroom light to 50 percent.
Alexa, brighten/dim bedroom light.
Alexa, set bedroom light to red.

You can also set up groups in Alexa APP. Tap "Create group", give your group a name like "my smart lights", select devices to add them in this group, then tap "Save". Now you can control your devices by group. If you say "Alexa turn on my smart lights", all the lights will be turned on.

Q & A

Why failed in adding device?

1. Make sure the device is powered on and close to your mobile phone when adding device.
 2. Make sure your mobile phone is connected to the Wi-Fi network and your Wi-Fi router is working properly.
 3. Make sure the device is ready for configuration. Please refer to the Product Instruction "Add Devices in Easy Mode" or "Add Devices in AP Mode" for details.
 4. Make sure the connected devices have not reached the maximum number of Wi-Fi router. If not, please disconnect the network of some devices.
 5. Make sure password of the Wi-Fi network is correct when adding new device.
 6. Make sure you have selected 2.4GHz Wi-Fi network if you have a dual-band Wi-Fi router.
 7. Make sure you have not used any Chinese Characters to name your Wi-Fi network.
- Can I control device with 2G/3G/4G network?
When adding device for the first time, it requires that your mobile phone and device are connected to the same Wi-Fi network. After adding device successfully, you can remote control your device with 2G/3G/4G network.

How can I share my device with others?

1. Open your Smart Life APP, select your device and tap the button in the top right corner. Tap "Device Sharing" and "Add", then select the country/region where the account belongs to and input the account (a phone number or an E-mail address) you want to share with. (Please make sure the phone number or E-mail is registered.)
 2. Open your Smart Life APP, tap "Profile" on the lower right corner of the APP. Select "Device Sharing" and add device you want to share with others, then select the country/region where the account belongs to and input the account (a phone number or an E-mail address) you want to share with. (Please make sure the phone number or E-mail is registered.)
- How can I manage the device shared by others?
Open your Smart Life APP, tap "Profile" on the lower right corner of the APP. Tap "Device Sharing", you will find devices shared by others.
