## Front

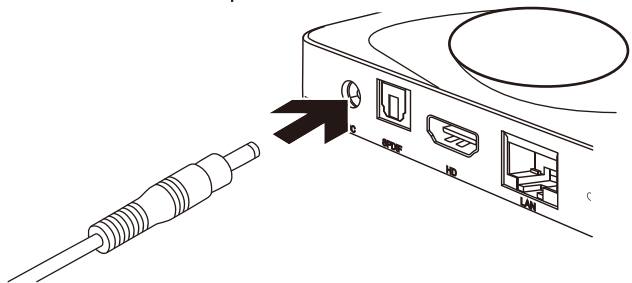

## Back

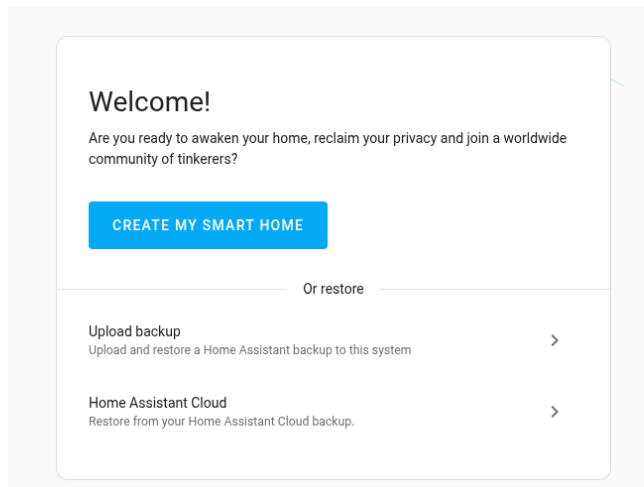

- 1 Connect the Ethernet cable from Home Assistant Box to your local home network router.

- 2 Plug the power supply cable into Home Assistant Box and connect it to a power outlet.

- 3 Wait for a few minutes until the System Startup. then do the 4 steps. If the webpage opens as shown in the picture below, the installation is successful. If the webpage cannot be opened, please continue to wait and check whether the power supply and network cable are plugged in properly.

- 4 Download the Home Assistant app on your tablet or phone, or open <http://homeassistant.local:8123> in your browser.
